

In Hong Kong, Aurionpro's SCMProFit solution streamlined operations and improved efficiencies for PACE Logistics and provided better visibility for their customers.

## PACE Logistics

Improving operational efficiencies with SCMProFit

### Challenge:

- Efficiently manage warehouse piece pick operations
- Manage buyers' consolidation at origin
- Enable online e-booking
- Manage freight operations

### Solution:

- Implementation of SCMProFit's end-to-end solution
- Implementation of the integrated warehousing, consolidation, and freight modules
- Configuration of centralized reporting and visibility tools

### Results:

- Increased efficiencies
- Improved productivity over previous manual-intensive processes
- Improved vendor collaboration
- Improved customer service levels

PACE Logistics, a Hong Kong based company, offers logistics services tailor-made for manufacturing and retailing corporations. Their global network, quality services, international management expertise, and advanced technology give the best services to their customers and business partners. PACE offers the following services:

- Sea and Air Freight
- Land Transportation
- Warehouse & Distribution Services

*"Pace Logistics offers integrated supply chain services to its clients and Aurionpro SCM's SCMProFit solution is the IT backbone of our operations. The extranet visibility of SCMProFit helps our customers to view real-time inventory and shipment status and is our face to our customers. The implementation of SCMProFit has streamlined our processes, and the web-based architecture has improved our control over multi-location operations. The biggest benefit of the solution for PACE is SCMProFit's SaaS-based model, which has helped us to be on the cutting edge of supply chain technologies while adding value to our customers by helping us to focus on our core supply chain operations."*

*-Simon Pun, Director, Pace Logistics*
