

A leading global logistics service provider streamlines end to end freight and warehouse operations to enhance customer service and enterprise-wide visibility

The Client

The client is a US headquartered global transportation and logistics service provider with a footprint in more than 140 countries and provides a full range of integrated supply chain management solutions.

Challenge

- Absence of a flexible and innovative SCM solution
- Local or manual systems in different countries
- Difficulty in gaining rapid growth and opening of new offices in multiple countries
- Flexible system to suit needs of each customer and country
- Managing Centralized data for enabling reporting and visibility to customers
- Standardizing processes and adopting best practices from the industry
- Multiple business workflows but a single view for management and customers
- Managing disparate size of offices in different countries

Solution

SCMProFit deployment consisting of a web based solution for global access adapting best practices from the industry

- Flexible solution with multi-lingual, multi-currency facilities
- Transaction based – ASP model
- Integration with external systems using different formats and technologies
- Enterprise-wide visibility
- Real time centralized architecture for single view
- Security measures for controlled access
- Customizable reporting flexibility
- Editable document generator and configurable document distribution
- Set up driven solution for reduced data entry
- Quick implementation in different countries

Results

Serving over 1100+ Customers

Implemented across 48 Global locations

Manages over 2500+ suppliers and 1600 users

Aurionpro's SCMProFit Streamlines End to End Warehouse and Freight Operations for a leading logistics service provider

Integrates services, improves visibility, centralizes reporting, standardizes processes across the globe for a leading supply chain solutions provider

The leading supply chain solutions provider manages end-to-end logistics operations for its customers spread across geographies. This means managing different workflows, multiple vendors and optimizing logistics flow, while providing complete visibility to customers. The client desired to have a unified platform for all services – from freight to warehouse management and centralized control over shipment costs and revenues. Additionally, they also required a solution for vendor collaboration and buyer consolidation to enable error-free operations. The client partnered with Aurionpro to streamline operations and enhance efficiencies, given its in-depth domain expertise. Aurionpro deployed SCMProFit – an integrated logistics product suite that catered to the client's end-to-end requirements. It provided a unified platform for all service deliveries and complete warehouse management, and brought 100% transparency into operations to improve visibility for customers. Aurionpro implemented Microsoft Axapta integration - a multi-language, multi-currency, industry-specific global enterprise resource planning (ERP) to enable complete operations from execution to finance & accounts.
